

Lumber Business Management Software

Key Features

Above and Beyond Customer Service

Unique Data Solutions is committed to our customers, and we truly desire to see our customers achieve business success. **We go the extra mile in customer service and we take care of our customers.**

Powerful Inventory Control

Lumbergear was designed to help you easily track your inventory and costs from multiple locations.

Customizable System

As your business grows and you discover your new requirements, Lumbergear can be further customized to suit your needs.

Centralized Data and Information

With one central information site, all your employees can obtain accurate real-time information when they need it.

Security

Powered by Microsoft SQL Server database, Lumbergear is a secure system. Management has the ability to restrict users from accessing modules.

Mill to Order Made Easy

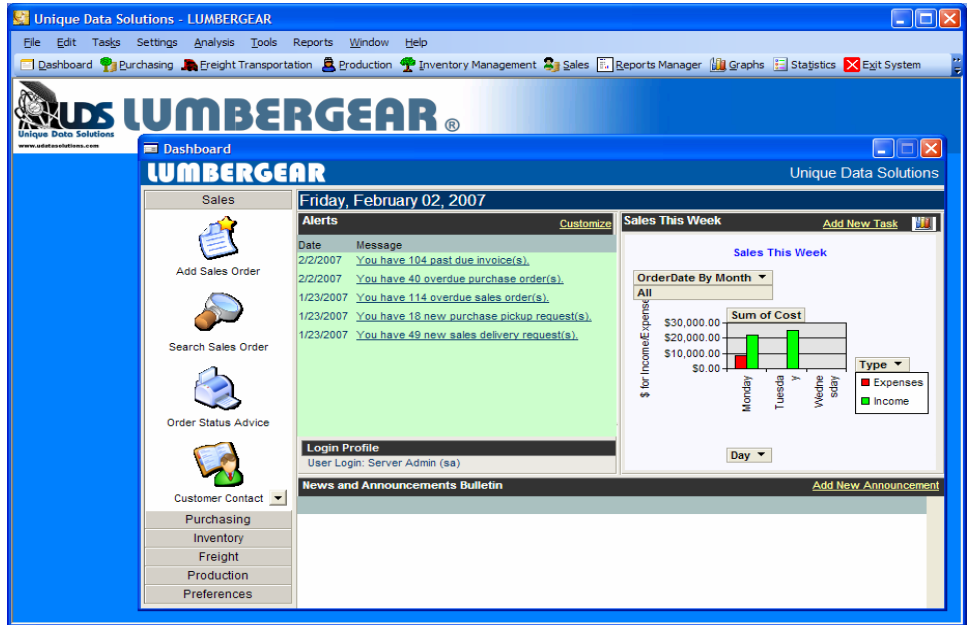

Lumbergear incorporates just-in-time principles that allow production teams to see customer orders immediately, allowing products to be produced to customer requirements and shipped on time.

Production

Using just-in-time principles, you can easily issue work orders as you purchase new materials to ensure that your production process is always on time.

Sales and Shipping

Easily issue sales orders, packing lists, packing tags, bills of lading, and invoices right from one screen.

System Overview

Lumbergear™ is a powerful, affordable and easy to use lumber business management software specifically developed for hardwood and softwood operations, wholesale and distribution, lumberyards, sawmills, and wood product manufacturers.

The system supports **powerful inventory management and costing**, complete sales and order processing, contact management, customer service, employee management, inventory barcoding, procurement and receiving, freight transportation and logistics, production management, remanufacturing, analysis, integrated reporting, and accounting integration with Microsoft Great Plains Accounting, Peachtree Accounting, and QuickBooks. Lumbergear also integrates with the Microsoft Office® System.

Additional modules, such as e-commerce and **LumberCell for wireless handhelds**, can also be included to suit your company needs. Lumbergear was designed to help you get your products effectively down the supply chain to meet the demands of your customers on-time, every time.

Inspired by Lumber Companies

Lumber wholesalers, hardwood and softwood distributors, lumberyards and sawmills, remanufacturers, and wood product manufacturers will find Lumbergear especially useful because we spent over two years of research and development and guidance from actual lumber companies. Lumbergear works because it was designed in a real lumber working environment using technology based on industry standards and following software development best practices.
